

I am a college student majoring in Radio and TV Broadcasting. I am scared of where radio is headed. I am scared that the field I have chose to dedicate my career to is going to be monopolized by Clear Channels Communications. They are taking over and you seem to be blind to it or more likely in their pockets. I hope that this complaint along with the many others that people before and after me, will prompt or better yet force you to intervene. We are a country still governed by the people for the people. Radio was intended to be in the best interest of the people. You have an obligation to do something. Is ownership concentration in the best interest of the people? I do not believe so.
